March 28, 2016

Dear Sirs:

I am sending you this letter to tell you of my experience with your Happy Shine product. Rarely do I compose such a letter, but this is an unusual situation.

I have owned a 62 foot mobile home for 9 years and have dealt with a persistent, annual problem. My vinyl siding, facing the north, has always formed a green and black film over the summer months from the high humidity in Florida. The mold and bacteria are hard to remove and keep clean. It has been a difficult chore every year. Also, it has been an embarrassment, since my neighbors easily see the ugly side of my mobile home when passing by. Last year, after scrubbing by hand and paying a professional to powerwash my siding, my neighbor told me about Happy Shine. I sprayed the north side from top to bottom with your product and wiped it with the microfiber cloth attached to a Swiffer. When it dried, the vinyl was slippery to the touch and shinier than the rest of the house. It looked great! Then, last April, since I am a snowbird, I travelled back to my home in the northeast for 7 months.

When I returned to Florida this past November, I was thrilled to see that there was NO mold or mildew on the siding. It looked just the way it did after the application of Happy Shine. I couldn't have been happier. It saved me hours of cleaning and scrubbing. Then, I used your product on the rest of the vinyl exterior, as well as many other items around the house, and on my car - all with excellent results.

Thank you for having the type of product that has helped me in so many ways. I will continue to buy Happy Shine and share my experience with others.

Sincerely yours,

A handwritten signature in cursive script that reads "Kathy Hoyt". The ink is dark and the signature is fluid and legible.
